

A special journal issue was dedicated to the 3<sup>rd</sup> Study Conference on BALTEX.

The following 16 papers appear in **Boreal Environment Research Vol.7, No 3:**

Alestalo, M.: Preface. pp. 173

Raschke, E., J. Meywerk, B. Rockel: Has the project BALTEX so far met its original objectives? pp. 175-182

Döscher, R., U. Willén, C. Jones, A. Rutgersson, H. E. M. Meier, U. Hansson, L. P. Graham: The development of the regional coupled ocean-atmosphere model RCAO. pp. 183-192

Fortelius, C., U. Andræ, M. Forsblom: The BALTEX regional reanalysis project. pp. 193-202

Lorant, V., N. MacFarlane, R. Laprise: A numerical study using the Canadian Regional Climate Model for the PIDCAP period. pp. 203-210

Pirazzini, R., T. Vihma, J. Launiainen, P. Tisler: Validation of HIRLAM boundary-layer structures over the Baltic Sea. pp. 211-218

Kücken, M., F.-W. Gerstengarbe, P. C. Werner: Cluster analysis results of regional climate model simulations in the PIDCAP period. pp. 219-224

Etling, D., G. Harbusch, B. Brümmer: Large-Eddy-Simulation of an off-ice airflow during BASIS. pp. 225-228

Gryning S.-E., E. Batchvarova: Marine boundary-layer height estimated from the HIRLAM model. pp. 229-235

Crewell, S., M. Drusch, E. van Meijgaard, A. van Lammeren: Cloud observations and modelling within the European BALTEX Cloud Liquid Water Network. pp. 235-246

Hollmann, R., A. Gratzki: The satellite derived surface radiation budget for BALTEX. pp. 247-252

Koistinen, J., D. B. Michelson: BALTEX weather radar-based precipitation products and their accuracies. pp. 253-264

Feijt, A., D. Jolivet, E. van Meijgaard: Retrieval of the spatial distribution of liquid water path from combined ground-based and satellite observations for atmospheric model evaluation. pp. 265-272

Sepp, M., J. Jaagus: Frequency of circulation patterns and air temperature variations in Europe. pp. 273-280

Post, P., V. Truija, J. Tuulik: Circulation weather types and their influence on temperature and precipitation in Estonia. pp. 281-290

Okulov, O., H. Ohvril, R. Kivi: Atmospheric precipitable water in Estonia, 1990 – 2001. pp. 291-200

Oesterle, H.: Selection of representative stations by means of a cluster analysis for the BAMAR region in the PIDCAP period. pp. 301-304.

The following 18 papers appear in **Boreal Environment Research Vol.7, No 4:**

Alestalo, M.: Preface. pp. 305

Roads, J., E. Raschke, B. Rockel: BALTEX water and energy budgets in the NCEP/DOE reanalysis II. pp. 307-318

Maslowski, W., W. Walczowski: Circulation of the Baltic Sea and its connection to the Pan-Arctic region - a large scale and high-resolution modeling approach. pp. 319-326

- Meier, H.E.M., R. Döscher: Simulated water and heat cycles of the Baltic Sea using a 3D coupled atmosphere-ice-ocean model. pp. 327-334
- Stipa, T., J. Vepsäläinen: The fragile climatological niche of the Baltic Sea. pp. 335-342
- Berger, F.H.: Surface radiant and energy flux densities inferred from satellite data for the BALTEX watershed. pp. 343-352
- Peters, G., B. Fischer, T. Andersson: Rain observations with a vertically looking Micro Rain Radar (MRR). pages 353-362
- Stigebrandt, A., H.U. Lass, B. Liljebladh, P. Alenius, J. Piechura, R. Hietala, A. Beszczynska: DIAMIX - An experimental study of diapycnal deepwater mixing in the virtually tideless Baltic Sea. pp. 363-370
- Brümmer, B., A. Kirchgäßner, G. Müller, D. Schröder, J. Launiainen, T. Vihma: The BALTIMOS (BALTEX Integrated Model System) field experiments: A comprehensive atmospheric boundary layer data set for model validation over the open and ice-covered Baltic Sea. pp. 371-378
- Gryning, S.-E., S. Halldin, A. Lindroth: Area averaging of land surface-atmosphere fluxes in NOPEX: challenges, results and perspectives. pp. 379-388
- Oltchev, A., J. Cermak, N. Nadezhdina, F. Tatarinov, A. Tishenko, A. Ibrom, G. Gravenhorst: Transpiration of a mixed forest stand: field measurements and simulation using SVAT models. pp. 389-398
- Malinin, V.N., A. Nekrasov, S. Gordeeva: Inter-annual variability of the Baltic Sea water balance components and sea level. pp. 399-404
- Lehmann, A., H.-H. Hinrichsen: Water, heat and salt exchange between the deep basins of the Baltic Sea. pp. 405-416
- Lindau, R.: Energy and water balance of the Baltic Sea derived from merchant ship observations. pp. 417-424
- Clemens, M., K. Bumke: Precipitation fields over the Baltic Sea derived from ship rain gauge measurements on merchant ships. pp. 425-436
- Kitaev, L., A. Kislov, A. Krenke, V. Razuvaev, R. Martuganov, I. Konstantinov: The snow cover characteristics of northern Eurasia and their relationship to climatic parameters. pp. 437-446
- Klavins, M., A. Briede, V. Rodinov, I. Kokorite, T. Frisk: Long-term changes of the river runoff in Latvia. pp. 447-456
- Rimkus, E., G. Stankunavichius: Snow water equivalent variability and forecast in Lithuania. pp. 457-462
